LIST OF CONTENTS

Number 1

R. P. Hesketh, A. W. Etchells and T. W. F. Russell	1	Bubble breakage in pipeline flow
J. Santamaría, A. Monzón, M. Berbegal and R. Hughes	11	Regeneration strategies for coked fixed bed reactors
H. Moon, H. C. Park and C. Tien	23	Adsorption of unknown substances from aqueous solutions
J. S. Vrentas, D. C. Venerus and C. M. Vrentas	33	An exact analysis of reservoir effects for rotational viscometers
E. Ayesa, M. T. Margeli, J. Flórez and J. L. García-Heras	39	Estimation of breakup and aggregation coefficients in flocculation by a new adjustment algorithm
A. A. Parshotam, S. M. Rao Bhamidimarri and G. C. Wake	49	A simple method for obtaining good bounds for solutions of reaction–diffusion equations with nonlinear kinetics
R. A. Novy, H. T. Davis and L. E. Scriven	57	A comparison of synthetic boundary conditions for continuous-flow systems
J. H. Hills	69	Non-isothermal adsorption in a pellet
K. Mannhardt and J. J. Novosad	75	Chromatographic movement of surfactant mixtures in porous media
K. Terasaka and H. Tsuge	85	Bubble formation at a single orifice in non-Newtonian liquids
G. Li and H. Rabitz	95	New approaches to determination of constrained lumping schemes for a reaction system in the whole composition space
M. R. Prairie, J. G. Highfield and A. Renken	113	Diffuse-reflectance FTIR spectroscopy for kinetic and mechanistic studies of CO_2 hydrogenation in a continuous recycle reactor
S. Cohen and D. Moalem Maron	123	Analysis of a rotating annular reactor in the vortex flow regime
H. Benkreira, S. Shillitoe and A. J. Day	135	Modelling of the butt fusion welding process
J. Comiti and M. Renaud	143	Liquid–solid mass transfer in packed beds of parallel-epipedal particles: energetic correlation
J. L. T. Azevedo and J. C. F. Pereira	155	Flow patterns around and inside a bubble in a gas-fluidised bed
M. A. A. Cox	167	Mercury injection measurements used in the prediction of rock pore dimensions employing a crystalline lattice of capillaries
S. K. Bhatia	173	Perturbation analysis of gas–solid reactions—I. Solid of low initial permeability

M. Matsuoka and **J. Garside**	183	Non-isothermal effectiveness factors and the role of heat transfer in crystal growth from solutions and melts
B. Al-Duri and **G. McKay**	193	Prediction of binary system for kinetics of batch adsorption using basic dyes onto activated carbon
R. David, P. Marchal, J.-P. Klein and **J. Villermaux**	205	Crystallization and precipitation engineering—III. A discrete formulation of the agglomeration rate of crystals in a crystallization process
A. J. Poslinski and **J. A. Tsamopoulos**	215	Inflation dynamics of fluid annular menisci inside a mold cavity—I. Deformation driven by small gas pressures
J. G. Tsikoyiannis and **J. Wei**	233	Diffusion and reaction in high-occupancy zeolite catalysts—I. A stochastic theory
J. G. Tsikoyiannis and **J. Wei**	255	Diffusion and reaction in high-occupancy zeolite catalysts—II. Experimental results
D. Meinköhn	265	Singularity theory concepts for a class of reaction–diffusion systems
B. Z. Li and **T. C. Ho**	273	Lumping weakly nonuniform bimolecular reactions
T. C. Ho	281	A simple expression for the collective behavior of a large number of reactions
W. R. Cluett and **P. R. C. Nelson**	291	Performance robustness of minimum variance and self-tuning regulators to disturbance model mismatch
M. Soltanieh and **S. Sadraei**	301	A simplified model for prediction of time-dependent axial dispersion coefficient
N. Vatistas	307	Danckwerts' degree of segregation for the axial dispersion model
Y. H. Yu and **S. D. Kim**	313	Bubble properties and local liquid velocity in the radial direction of cocurrent gas–liquid flow
C. R. Kleijn and **C. J. Hoogendoorn**	321	A study of 2- and 3-D transport phenomena in horizontal chemical vapor deposition reactors
Z. J. Grzywna and **A. M. Simon**	335	Transient diffusion experiments in catalytically active membranes
J. T. Tinge, H. C. Op 't Ende, H. J. C. Berendsen and **A. A. H. Drinkenburg**	343	The absorption of propane and ethene in slurries of activated carbon in water—II
J. J. Thiart, H. J. Viljoen, K. Kriel, J. Puszynski, J. E. Gatica and **V. Hlavacek**	351	Development of thermal stresses in reacting media—I. Failure of catalyst particle
		Shorter Communications
S. K. Bhatia	361	Analysis of catalytic reactor operation with periodic flow reversal
G. Kluge, Th. Franke, R. Schöllner and **G. Nagel**	368	Estimation of component loadings in fixed-bed adsorption from breakthrough curves of binary gas mixtures in nontrace systems
M. P. Srinivasan, J. M. Smith and **B. J. McCoy**	371	Ethyl acetate desorption from activated carbon with supercritical carbon dioxide: effect of initial loading

D. A. White 375 Correlation of ternary equilibrium data for use in computer-based calculations for solvent extraction plant design

Letter to the Editors

J. Gibb 377 Pressure and viscous forces in an equilibrium fluidized suspension

Number 2

T. J. Mountziaris and **R. Jackson** 381 The effects of aeration on the gravity flow of particles and gas in vertical standpipes

W. J. A. Wammes, S. J. Mechielsen and **K. R. Westerterp** 409 The influence of pressure on the liquid hold-up in a cocurrent gas–liquid trickle-bed reactor operating at low gas velocities

S. J. Judd and **G. S. Solt** 419 Electrophoretically-assisted depth filtration of aqueous suspensions through various fibrous media

H. Yoshida, M. Maekawa and **M. Nango** 429 Parallel transport by surface and pore diffusion in a porous membrane

G. M. Martinez 439 Fast cures for thick laminated organic matrix composites

R. Ratnam and **V. S. Patwardhan** 451 Sensitivity analysis for heat exchanger networks

D. R. Morris 459 Exergy analysis and cumulative exergy consumption of complex chemical processes: the industrial chlor-alkali processes

A. Vetere 467 Equations of state: Maxwell and van der Waals re-visited—the prediction of the volumetric properties of pure gases

J. A. Ochoa-Tapia, P. Stroeve and **S. Whitaker** 477 Facilitated transport in porous media

U. Budde and **M. Wulkow** 497 Computation of molecular weight distributions for free radical polymerization systems

M.-L. Wang and **H.-S. Wu** 509 Kinetic and mass transfer studies of a sequential reaction by phase transfer catalysis

H. S. Kheshgi and **L. E. Scriven** 519 Dewetting: nucleation and growth of dry regions

S. Nešić and **J. Vodnik** 527 Kinetics of droplet evaporation

A. Kubaczka and **J. Bandrowski** 539 Solutions of a system of multicomponent mass transport equations for mixtures of real fluids

M. Berezowski 557 Method for analysing local stability of pseudohomo-geneous chemical reactors with recycle

J. A. Ritter and **R. T. Yang** 563 Equilibrium theory for hysteresis-dependent fixed-bed desorption

C.-C. Lai and **C.-S. Tan** 575 Approximate expressions for second-order reaction effec-tiveness factors in trickle-bed reactors

G. Li and **H. Rabitz** 583 Determination of constrained lumping schemes for non-isothermal first-order reaction systems

A. J. Poslinski, D. Orlicki and J. A. Tsamopoulos 597 Inflation dynamics of fluid annular menisci inside a mold cavity—II. Deformation driven by large gas pressures

Th. Riede and **E.-U. Schlünder** 609 Diffusivities of the ternary liquid mixture 2-propanol–water–glycerol and three-component mass transfer in liquids

M.-L. Wang and **H.-M. Yang** 619 Dynamics of phase transfer catalyzed reaction for the allylation of 2,4,6-tribromophenol

E. P. Vrahopoulou 629 A model for fluid flow in dies

P. A. Olowson and **A. E. Almstedt** 637 Influence of pressure on the minimum fluidization velocity

S. R. Wickramasinghe, D. V. Boger, H. R. C. Pratt and **G. W. Stevens** 641 Diffusion in elastic fluids

S. H. Lin 651 Gelation of sodium alginate in a batch process

S. Wachi, A. G. Jones and T. P. Elson 657 Flow dynamics in a draft-tube bubble column using various liquids

H. A. Al-Ghawas and **O. C. Sandall** 665 Simultaneous absorption of carbon dioxide, carbonyl sulfide and hydrogen sulfide in aqueous methyldiethanolamine

A. Gorius, M. Bailly and **D. Tondeur** 677 Perturbative solutions for non-linear fixed-bed adsorption—I. Approximate analytical solutions for asymptotic fronts

A. Gorius, M. Bailly and **D. Tondeur** 685 Perturbative solutions for non-linear fixed-bed adsorption—II. Approximate analytical expressions for the dynamics of micro-columns

J. C. Masy and **M. Cournil** 693 Using a turbidimetric method to study the kinetics of agglomeration of potassium sulphate in a liquid medium

Shorter Communications

H. J. Wubs, A. A. C. M. Beenackers and R. Krishna 703 Absorption of hydrogen sulfide in aqueous solutions of iodine—a critical review

G. E. Mueller 706 Prediction of radial porosity distributions in randomly packed fixed beds of uniformly sized spheres in cylindrical containers

S. Nishio, J. P. Kavanagh and J. Garside 709 A small-scale continuous mixed suspension mixed product removal crystallizer

Announcement

713 Symposium on Electrochemistry in Microheterogeneous Fluids: Call for Papers

Number 3

L. Brannon-Peppas and **N. A. Peppas** 715 Equilibrium swelling behavior of pH-sensitive hydrogels

G. Y. Chung, B. J. McCoy, J. M. Smith, D. E. Cagliostro and M. Carswell 723 Chemical vapor infiltration: modelling solid matrix deposition in ceramic–ceramic composites

C. Yang, M. Kümmel and H. Søeberg 735 Dynamic model for a thermal transit-time flow sensor

C. A. Savastano and **E. S. Ortiz**	741	Effect of changing hydrodynamic conditions on the rate of processes at liquid–liquid interfaces: metal ion extraction and water solubilization by reversed micelles
R. Patel and **H. Benkreira**	751	Gravure roll coating of Newtonian liquids
T. Nishimura, H. Miyashita, S. Murakami and **Y. Kawamura**	757	Oscillatory flow in a symmetric sinusoidal wavy-walled channel at intermediate Strouhal numbers
J.-Y. Day, H. Littman, M. H. Morgan III, Z. B. Grbavcic, Dz. E. Hadzismajlovic and **D. V. Vukovic**	773	An axisymmetric model for fluid flow in the annulus of a spout-fluid bed
P. E. Anagbo, J. K. Brimacombe and **A. E. Wraith**	781	Formation of ellipsoidal bubbles at a free-standing nozzle
S. C. Cho and **W. K. Lee**	789	Steam bubble formation at a submerged orifice in quiescent water
L. Limqueco, J. C. Kantor and **S. Harvey**	797	Nonlinear adaptive observation of an exothermic stirred-tank reactor
J. Jager, S. de Wolf, H. J. M. Kramer and **E. J. de Jong**	807	Estimation of nucleation kinetics from crystal size distribution transients of a continuous crystallizer
A. N. S. Mak, C. A. J. Koning, P. J. Hamersma and **J. M. H. Fortuin**	819	Axial dispersion in single-phase flow in a pulsed packed column containing structured packing
K. Dam-Johansen and **K. Østergaard**	827	High-temperature reaction between sulphur dioxide and limestone—I. Comparison of limestones in two laboratory reactors and a pilot plant
K. Dam-Johansen and **K. Østergaard**	839	High-temperature reaction between sulphur dioxide and limestone—II. An improved experimental basis for a mathematical model
K. Dam-Johansen, P. F. B. Hansen and **K. Østergaard**	847	High-temperature reaction between sulphur dioxide and limestone—III. A grain–micrograin model and its verification
K. Dam-Johansen and **K. Østergaard**	855	High-temperature reaction between sulphur dioxide and limestone—IV. A discussion of chemical reaction mechanisms and kinetics
R. K. Rajamani and **J. A. Herbst**	861	Optimal control of a ball mill grinding circuit—I. Grinding circuit modeling and dynamic simulation
R. K. Rajamani and **J. A. Herbst**	871	Optimal control of a ball mill grinding circuit—II. Feedback and optimal control
G.-J. Tsai and **G. T. Tsao**	881	Dynamic response and parameter estimation in a two-phase continuous flow stirred tank reactor
G.-J. Tsai and **G. T. Tsao**	889	Dynamic response of an isothermal three-phase slurry reactor—I. The PM-PM-HS/ID model: analytical solutions for continuous and semi-batch operations
		Shorter Communications
S. R. Inamdar, V. Ravi Kumar and **B. D. Kulkarni**	901	Dynamics of reacting systems in the presence of time delay

U. Rodemerck and **A. Seidel** 908 Analysis of transient mass transfer measurements in bubble columns

A. Axelsson, B. Westrin and **D. Loyd** 913 Application of the diffusion cell for the measurement of diffusion in gels

917 Erratum

Number 4

S. V. Jadhav and **V. G. Pangarkar** 919 Particle–liquid mass transfer in three-phase sparged reactors: scale-up effects

S. Wachi and **J. G. Yates** 929 Downward lean powder flow in a vertical tube

F. Ruhland, R. Kind and **S. Weiss** 939 The kinetics of the absorption of sulfur dioxide in calcium hydroxide suspensions

R. Woinet, G. Thomas and **J. Bordet** 949 Adaptive control based on pole placement: an experimental test on a binary distillation column

M. Lukáč and **Z. Peřina** 959 A dynamic model of physical processes in chromatographic glucose–fructose separation

R. Vaidyanathan and **C. Tien** 967 Hydrosol deposition in granular media under unfavorable surface conditions
